SUMMARY

- Senior Angular / Full-Stack Engineer with 7+ years of experience working in corporate environments on enterprise web applications.
- Extensive experience in the Healthcare domain, building and supporting large-scale, production-critical healthcare products.
- Strong expertise in developing single-page applications (SPA) using Angular, with deep knowledge of TypeScript, RxJS, ECMAScript(ES6) and Angular Material.
- Hands-on experience building and integrating RESTful services, managing complex asynchronous data flows, and cross-module communication.
- Proven ability to design and develop applications end-to-end, spanning frontend (Angular), backend (Node.js / Express / InterSystems Cache), and databases (MongoDB, PostgreSQL).
- Hands-on backend experience using Node.js and Express.js, with working knowledge of MongoDB and PostgreSQL.
- Practical exposure to AWS cloud services including EC2, S3, IAM, and CI/CD pipelines in real production environments.
- Proven experience implementing Progressive Web App (PWA) capabilities to improve performance, resilience, and offline usability.
- Strong background in test-driven and automation-focused development, creating reliable test suites using Cypress.
- Experience building data visualization dashboards using D3.js and Chart.js for business insights.
- Hands-on experience with authentication and authorization mechanisms such as JWT and OAuth2.
- Proven ability to analyze, debug, and optimize application performance, identifying bottlenecks across frontend and backend layers.
- Actively involved in design discussions, code reviews, mentoring junior engineers, and collaborating with cross-functional stakeholders.
- Experience working across all phases of development in Agile / SAFe Agile environments, delivering features predictably.

TECHNICAL SKILLS

Frontend: Angular(version 2 through 16+), RxJS, Angular Material, HTML, CSS

Backend: Node.js, Express.js, InterSystems Cache (ObjectScript)

Databases: PostgreSQL, MongoDB

Languages: TypeScript, JavaScript (ES6+)

Cloud and DevOps: AWS (EC2, S3, IAM, CI/CD), Linux

Testing & Automation: Cypress

EXPERIENCE

Surgical Information Systems

Senior Software Engineer

May 2023 – Present

Hyderabad, India

- Own technical direction and delivery for a 4-member engineering team, driving architecture decisions, sprint execution, and code quality standards.
- Design and scale enterprise Angular applications, applying optimized change-detection strategies to improve UI performance and long-term maintainability.
- Architected and led “Ignition”, a high-concurrency Node.js automation platform for bulk healthcare data creation and load simulation.
- Engineered controlled concurrency and request orchestration to safely execute thousands of API calls while preventing race conditions and database deadlocks — without backend changes.
- Reduced execution time from 2.5 hours to 15–17 minutes (9× improvement), significantly accelerating testing and release cycles.
- Drove engineering best practices through code reviews, architecture discussions, and mentoring, improving overall team maturity.
- Collaborated closely with QA, DevOps, and product stakeholders to deliver predictable, on-time releases under SAFe Agile and Kanban models.

Quest Diagnostics

Feb 2020 – Apr 2023

Senior Software Engineer

Hyderabad, India

- Owned end-to-end feature delivery, designing and implementing Angular frontend, InterSystems Cache backend services, and Cypress-based automated tests to ensure production-ready releases.
- Built reusable, scalable Angular components and services that became the foundation for multiple enterprise healthcare workflows.
- Owned integration of complex Angular modules with RESTful APIs, handling asynchronous data flows, error states, and cross-module communication at scale.
- Implemented Progressive Web App (PWA) capabilities to improve performance, resilience, and offline usability.
- Led adoption of Cypress-based automation, significantly improving test reliability and reducing dependency on manual regression testing.
- Supported CI/CD pipelines and AWS deployments, ensuring stable releases across multiple environments.

Prutech Solutions

Nov 2018 – Nov 2019

Software Engineer

Hyderabad, India

- Developed data visualization dashboards using D3.js and Chart.js, transforming complex datasets into actionable business insights.
- Built Angular-based single-page applications for enterprise analytics platforms.
- Implemented business logic using TypeScript, RxJS, and modern JavaScript (ES6+).
- Collaborated with backend teams to integrate Node.js APIs with SQL Server, ensuring reliable and performant data flow.

People Tech Group

Oct 2017 – Aug 2018

Management Trainee and Junior Software Engineer

Hyderabad, India

- Began professional career building web applications using HTML, CSS, JavaScript, and Angular
- Gained hands-on exposure to Linux environments, databases, and enterprise SDLC practices.
- Implemented real-time WebSocket notifications using Socket.IO, enabling bi-directional communication between Angular clients and servers.

PROJECTS

SIS Complete

May 2023 – Present

- Designed a reusable data-driven Angular component, significantly reducing repetitive development for new data tables.
- Led and onboarded a new Angular team, delivering 100% of the planned feature roadmap on schedule.
- Drove organization-wide transition to Cypress automation, improving test coverage and release confidence.

Ignition - Bulk Data Seeder and Load Simulation (Initiative)

June 2025 – Present

- Designed and built a Node.js-based internal platform to automate bulk healthcare data creation at scale.
- Engineered safe concurrency controls to execute thousands of API calls under real system constraints.
- Reduced data seeding time from hours to minutes, standardizing automation across multiple teams.

Quanam® Lab Services Manager

Feb 2020 – Apr 2023

- Built full-stack healthcare solutions using Angular, Node.js, and InterSystems Cache.
- Implemented client-side, API-level caching, reducing redundant calls and improving application responsiveness.
- Applied SAFe Agile Practitioner principles to improve sprint predictability and cross-team coordination.

Sentiment 360

Nov 2018 – Nov 2019

- Replaced static tabular reports with interactive data visualization dashboards, improving clarity and decision-making for business users.

Ubikite - DaaS Manager

Oct 2017 – Aug 2018

- Implemented real-time WebSocket-based notifications, eliminating frequent page refreshes.
- Integrated Microsoft-based authentication on the Angular frontend, replacing a basic OAuth 2.0 login flow.

EDUCATION

Biju Patnaik University of Technology

B.Tech in Electronics and Telecommunication

Bhubaneswar, Odisha

Aug 2013 – May 2017
